

39. iPODS The iPod shown, in the text on page 77, has 80 gigabytes (GB) of storage space. From the information in the bar graph, determine how many gigabytes of storage space are used and how many are free to use.

41. TREES The height of the tallest known tree (a California Coastal Redwood) is 379 feet. Some scientists believe the tallest a tree can grow is 47 feet more than this because it is difficult for water to be raised from the ground any more than that to support further growth. What do the scientists believe to be the maximum height that a tree can reach? (Source: BBC News)
43. TIME There are 60 minutes in an hour, 24 hours in a day, and 7 days in a week. How many minutes are there in a week?
