Section 2.2 - Adding Integers

You get paid \$30 and then you get paid \$50
 $30 + 50 = 80$

Same
sign
add

You ~~get~~ spend \$30 and you spend \$50

$$-30 + (-50) = -80$$

You get paid \$30 and you spend \$50

$$30 + (-50) = -20$$

opposite
sign

subtract

You spend \$30 and get paid \$50

$$-30 + (50) = 20$$

$$24. \quad \begin{array}{l} -43 \\ \text{spend} \end{array} + \begin{array}{l} (-12) \\ \text{spend} \end{array} = -55$$

$$34. \quad \begin{array}{l} 4 \\ \text{have} \end{array} + \begin{array}{l} (-2) \\ \text{spend} \end{array} = 2$$

$$\begin{aligned} 70. \quad & \underline{5+4} + \underline{(-6)+(-4)+(-5)} \\ & = 9 + (-15) \\ & = -6 \end{aligned}$$

$$\begin{aligned} & \cancel{5} + \cancel{4} + (-6) + \cancel{(-4)} + \cancel{(-5)} \\ & = -6 \end{aligned}$$

$$50. \quad (-32+13) + [5+(-14)]$$

$$= -19 + (-9)$$

$$= -28$$

↖ () are separating the + and - symbols

red - negative
black - positive
